AKOYA MEDICAL

CLINICAL PRODUCT OVERVIEW

PATIENT-COMFORT PRODUCT

A focused visual barrier for needle-based care

Akoya Eye Shield is a single-patient-use, nonsterile visual barrier designed to limit a patient's view of procedural activity below eye level while leaving an upper viewing area open.

SINGLE-PATIENT USE

AKOYA EYE SHIELD

WHAT THE DESIGN DOES

Limits the lower procedural view

An opaque lower region and conformable interface are designed to limit visibility below eye level.

Leaves an upper viewing area open

The open upper area allows partial forward or upward visibility.

CURRENT PRODUCT FACTS

- Single-patient use; not intended for reuse
- Nonsterile
- Latex-free
- Assembled in the USA
- Available by quote in flexible quantities

SETTINGS PROPOSED FOR ORGANIZATIONAL REVIEW

- IV placement
- Port access
- Blood draws
- Selected injections

SUGGESTED ORGANIZATION-LED EVALUATION

A 30-day, one-site starting framework

01 PRODUCT REVIEW

Akoya supplies samples, available documentation, and a brief staff demonstration.

02 ONE-SITE EVALUATION

The organization sets the site, scope, patients, duration, and applicable requirements.

03 NEXT-STEP DECISION

The organization decides whether pricing or a paid rollout discussion is appropriate.

INITIAL PATIENT-REPORTED FEEDBACK

96% recommendation

45 completed questionnaires among 50 patients in a breast-biopsy setting. Descriptive feedback only; not a controlled clinical study.

PATENT INFORMATION

Technology and method described in U.S. Patent No. 12,629,282 B1, issued May 19, 2026.
